To: **Admiral Robert J. Papp, Jr.**
Commandant, U.S. Coast Guard
Bob Perciasepe
Acting Administrator, U.S. Environmental Protection Agency
Dr. Kerri-Ann Jones
Assistant Secretary of State, U.S. Department of State

Re: Retain Original Deadline of 2016 for NOx Standards in the North American
Emission Control Area

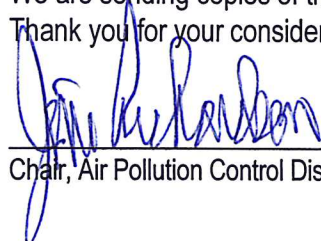

Dear Commandant Papp, Acting Administrator Perciasepe, and Assistant
Secretary Jones:

The Santa Barbara County Air Pollution Control District (District) Board of Directors is concerned about the recent action by the International Maritime Organization (IMO) Marine Environment Protection Committee proposing a delay of five years for the implementation of nitrogen oxides (NOx) standards in Emission Control Areas, including the North American Area. We understand the U.S. delegation voted against the proposed delay, but delegations from other countries prevailed.

The Committee will take final action on this item in March of 2014, and **we urge the U.S. delegation to vigorously oppose the proposed delay and pursue retention of the original deadline of 2016.**

NOx is a precursor to ozone and Santa Barbara County does not attain the California state standard for ozone, and only attains the federal ozone standard by a slim margin. Large ships are a major source of NOx in our county. Without regulatory authority over these ship engines, the District relies on international regulations to achieve reductions from this huge source of NOx emissions. We urge you to make forceful efforts to retain the original deadline of 2016.

We are sending copies of this letter to a number of individuals, see list next page.
Thank you for your consideration.

Chair, Air Pollution Control District Board

Clerk of the APCD Board:

Louis D. Van Mullem, Jr.
