

MEMORANDUM

To: District Community Advisory Council

Contact: Ben Ellenberger (961-8879)

Subject: Consensus Decision Making Workshop

Meeting: October 14, 2015

The CAC is chartered to consider issues related to air pollution planning and rulemaking and to render advice to the District Board and the Air Pollution Control Officer. The CAC's deliberations and recommendations consider the effects of District planning and rulemaking actions on the public health, the economy of Santa Barbara County, the costs to industry and the public, and consistency with all applicable local, state and federal laws. In establishing the CAC, it was the goal of the District to promote cooperation characterized by interest-based negotiation and to develop recommendations by consensus.

This workshop will include training designed to foster productive deliberation of issues brought before the CAC.
