

MEMORANDUM

TO: Community Advisory Council (CAC) Members

FROM: Ben Ellenberger

SUBJECT: 2016 Ozone Plan – Introduction and Proposed Stationary Source Emission Control Measures

DATE: February 24, 2016

MEETING: March 9, 2016

Every three years, the District updates our plan to attain the state 1-hour and 8-hour ozone standards. We will provide background on the history of our planning efforts, discuss the process for developing and reviewing the plan, and discuss how the plan will be implemented. This meeting will also present the stationary source control measures proposed for this plan update.

Enclosed please find the draft proposal for stationary source control measures, and the associated attachments, to be included in the 2016 Ozone Plan. This document describes the proposed stationary source emission control measures that could be adopted in Santa Barbara County to further reduce ROC and NO_x emissions. The District is required to propose every feasible control measure to help the County meet the health-based state ozone standards by the earliest practicable date.

The District plans to discuss this proposal at the March 9, 2016 Community Advisory Council meeting, which will be informational only (i.e., no formal CAC recommendation sought).

We plan to hold at least two more meetings with the CAC to review and discuss the 2016 Ozone Plan. These meetings will address the emission inventory, air quality trends, and the proposed transportation control measures in more detail. The final meeting will present the proposed 2016 Ozone Plan for the CAC to consider. After receiving input from the CAC, we intend to take the Ozone Plan to the District Board for a public hearing and adoption later in 2016.

If there are questions or concerns that you would like to discuss beforehand, please contact me at (805) 961-8879 [e-mail: ellenbergerc@sbcapcd.org] or Tim Mitro at (805) 961-8883 [e-mail: mitrot@sbcapcd.org].
