Hi David,

Hope you're doing well and yes we use the ARB factors.

Subject: Winery Emission Factors

Hey Gary,

Long time no see. Congrats on your promotion! I have a pretty simple question, so feel free to bump it down to your Engineering staff. I am just wondering if SLO uses the wine fermentation emission factors developed by CARB (6.2 lb/kgal for red wine and 2.5 lb/kgal for white wine) for calculating emissions for your winery permits.

Thanks!
