

SANTA BARBARA COUNTY
AIR POLLUTION CONTROL DISTRICT
POLICIES AND PROCEDURES

Policy No.	<u>6100.003.2016</u> Div Pol Yr	Draft	<u> </u>
Supersedes No.	<u>6100.003.1988</u> Div Pol Yr	Final	<u> x </u>
Date:	<u>August 25, 2016</u>	Pages	<u> 1 </u>
Topic:	<u>Contiguous or Adjacent Properties</u>		
Distribution:	<u>Engineering Division Staff</u>		

This policy provides guidance on the terms "contiguous or adjacent properties" (Rule 102) as related to onshore oil and gas facilities. Onshore oil and gas facilities on one or more leases which have a common surface border shall be considered one stationary source (assuming the "industrial grouping" and "common control" requirements have been met). Leases separated by a narrow corridor (e.g., road, utility right-of-way) shall be considered to have a common surface border.

All pipeline emissions (e.g., fugitive hydrocarbons) shall be considered part of a permitted stationary source located within the County. Pipelines connecting facilities located on leases which do not share a common surface border shall be considered part of the permitted stationary source located up-stream. Where the up-stream stationary source is located outside the County, the down-stream stationary source within the County shall be used.

Policies and Procedures Memoranda are intended to provide agency staff, applicants and the public guidance relative to standardized APCD procedures. These policies and procedures shall not be interpreted in conflict with APCD Rules and Regulations or administrative policies, and may be modified or updated periodically without advance notice.
