

MEMORANDUM

TO: Community Advisory Council Members

FROM: Joe Petrini, Emission Inventory/Planning Specialist

DATE: August 30, 2006

SUBJECT: 2007 Clean Air Plan Draft Chapter 6 – Emission Forecasting

Please find attached draft Chapter 6 of the 2007 Clean Air Plan that includes a discussion of forecasted emissions for Santa Barbara County. Emission inventory projections are used to determine whether local, State and federal emission control measures will reduce enough emissions in order to attain the State 1-hour and 8-hour ozone standards, and maintain the federal 8-hour ozone standard while accounting for the growth that is expected to occur in the county.

Please do not hesitate to call me at (805) 961-8894 if you have any questions regarding draft Chapter 6 prior to the September 13th meeting.
