As requested by the CAC, attached please find draft Chapter 11 of the 2010 Clean Air Plan – Transportation, Land Use and Air Quality. The first four sections of this chapter are essentially the Land Use chapter proposed (and rejected by the APCD Board of Directors) for the 2004 Clean Air Plan. The final three sections discuss SB 375, VMT reduction for select land use and transportation policies and the potential emission reductions which could be realized.
