Re: Draft Authority to Construct/Permit to Operate 15393

Dear Mr. Bauer:

Enclosed is the draft Authority to Construct/Permit to Operate (ATC/PTO) No. 15393 for a diesel-fired emergency standby generator at 955 La Paz Road in Santa Barbara. Please carefully review the enclosed documents to ensure that they accurately describe your facility and that the conditions are acceptable to you. Note that your permitted emission limits may, in the future, be used to determine emission fees.

The estimated permit issuance fee based on our analysis to date is \$7,382; you can review our calculation of the fee in the enclosed Permit Evaluation. The final fee amount due will be specified when the final permit is issued. Please do not pay this fee now, as we will invoice you when the final permit is issued.

If you have any comments on this draft permit, submit them in writing to the Air Pollution Control District within 21 days from the date of this letter. We will consider your comments before we issue your final permit. Please include the FID and Permit numbers in any correspondence regarding this permit. If we receive no comments within this period, we will issue a **final** permit with the enclosed conditions. If you have no comments and wish to receive the final permit earlier, please call the number below.

Thank you for your cooperation. If you have any questions, please call me at (805) 961-8877.

Sincerely,

Charlotte Mountain, Air Quality Engineer II
Engineering Division
