

Eligible Costs

Costs that can be covered by the voucher include:

- Cost of the new device (basic model) including sales tax.
- Installation of the new device including any parts, materials, permits, or labor required for the safe and legal installation of the new device.
- Removal and disposal of the old stove or insert.
- If residence does not have functional smoke and carbon monoxide detectors, the purchase and installation of new detectors.
- For fireplace replacement- if the existing fireplace is structurally sound, the purchase and installation of a fireplace insert utilizing wood, natural gas, propane, or electricity; if the fireplace lacks structural integrity, the purchase of a free-standing home heating device.

The applicant is responsible for paying all costs that exceed their voucher amount or that are not included above. Please be aware that the Standard Voucher amount **will not** cover the entire cost of the new heating device, installation, required permits, and any code upgrades that may be required. Please also note that the voucher covers the cost of a basic model. If the applicant wishes to install an upgraded model that is above the basic model, the cost difference will not be included as an eligible cost under the voucher.
