

Forecast conditions represent impacts from smoke. Contributions from ozone and other pollutants are not reflected.

Fire Information: Yesterday fire crews continued to build direct handline along the northeast corner of the fire from Mono Creek through Pie Canyon and Indian Creek drainage. Air support from helicopters assisted the ground crew's efforts in securing the fireline. Last night crews monitored and patrolled for hot spots inside of the fire perimeter. The priority for today will be securing and mopping-up the remaining uncontained fireline on the northeast corner of the fire. Fire crews will continue to build direct handline from Mono Creek through Pie Canyon and Indian Creek drainage. Mop-up and patrol will continue on the other portions of the fire. The fire showed no growth yesterday, but is 54% contained.

Weather and Smoke Information: A high pressure system arrived this morning bringing with it warmer and drier weather. Transport winds are expected to be light and out of the north northeast. All forecasted areas should see **Good** conditions with possible hazy skies overnight and early morning as the fire activity winds down.

Smoke Impacts

Site	Observed Midnight- Midnight August 27, 2016	Forecast August 28, 2016	Outlook August 29, 2016	Worst Time of Day Impacts AQI and Period

Santa Maria	Good	Good	Good	May see hazy conditions overnight and early morning.
Santa Ynez	Good	Good	Good	May see hazy conditions overnight and early morning.
Goleta	Good	Good	Good	May see hazy conditions overnight and early morning.
Santa Barbara	Good	Good	Good	May see hazy conditions overnight and early morning.
Ojai	Good	Good	Good	May see hazy conditions overnight and early morning.

Colors displayed above correspond roughly with the AQI chart below.

Conditions may change quickly, these projections are based on anticipated weather and fire activity. Sensitive groups including individuals with Asthma, lung or heart disease, children, older adults, and pregnant women should take precautions to avoid exposure to smoke. If you feel as though you are having health effects from smoke see your doctor or health professional as needed. In some cases your eyes are your best tools, if it is smoky outside you are being impacted. Use caution when driving in or around smoky areas.

AQI Index	Actions to Protect Yourself
Good	None
Moderate	Unusually sensitive people should consider reducing prolonged or heavy outdoor exertion.
Unhealthy for Sensitive Groups - USG	People with heart or lung disease, children and older adults should reduce prolonged or heavy outdoor exertion. Everyone else should limit prolonged or heavy exertion.
