ONSITE MEIR FAMILY HOUSING IN GREEN

OFFSITE PMI IN ORANGE
OFFSITE MEIR IN BLACK

¹ This isopleth applies to onsite family housing and offsite residential homes that garden (i.e., family housing that consume homegrown produce). Attachment B shows the Tier 2 Residential Cancer Risk isopleth for non-family housing only (e.g., onsite dorms or residences where children do not reside). Attachment C shows the Tier 1 Residential Cancer Risk isopleth for homes that do not garden (i.e., no consumption of homegrown produce).

² The onsite MEIR non-family housing is shown for informational purposes only; no significant cancer risk was calculated at this resident for risk management purposes. Tier 2 options apply based on the residential type. See Attachment B for the Tier 2 isopleth.
