**Re: Final Approval of 2018 ATEIR for UCSB
Air Toxics “Hot Spots” Information and Assessment Act (AB 2588)**

Dear Ali Aghayan:

The Santa Barbara County Air Pollution Control District (District) has reviewed UCSB’s revised 2018 Air Toxics Emission Inventory Report (ATEIR) submitted April 3, 2023 and the revised ATEIR calculations, *Appendix A.xlsx*, submitted April 18, 2023. Based on our review of the submittals, the District approves the ATEIR submitted April 3, 2023, and the ATEIR calculations, *Appendix A.xlsx*, submitted April 18, 2023.

As noted by email to Dudek on April 27, 2023, the District is providing a one-month extension for the health risk assessment (HRA) submittal to allow more time for the lead HRA. Please submit the HRA based on the Final Approved ATEIR on or by July 15, 2023. Electronic copies of the HRA should be sent via email to CobbsR@sbcapcd.org.

If you have any questions or require additional information, please contact me at CobbsR@sbcapcd.org or (805) 979-8320.

Sincerely,

Robin Cobbs
Engineering Division
