

FIBERGLASSING FACILITY APPLICATIONS

Applications for Authority to Construct Permits (ATC) from the Santa Barbara County Air Pollution Control District (District) for Fiberglass Application Operations require the information listed below. When completing the application forms, please be as thorough as possible. Applications received by the District which lack specific information shall be deemed incomplete, and no further action shall be taken by the District until adequate information is provided for processing. If you have any questions regarding application requirements, please contact the Fiberglassing Facility Project Manager at (805) 961-8800.

Application Forms:

APCD-1, -8 and -9.

Application Filing Fee:

Application filing fee is listed on the supplements to APCD-1. A filing fee must accompany all applications submitted to the District.

Facility Plot Plan:

Include a facility plot plan depicting the areas of fiberglass application, material storage, spraybooths, exhaust stacks, fume collection devices, air ventilation equipment, dust collection devices and any air pollution control devices (carbon adsorption devices, thermal oxidizers, baghouses, material filters). Also included on the facility plot plan must be other businesses/buildings within 200 feet of your property.

Equipment Descriptions:

All air pollution control equipment must be described, in detail (eg: make, model number, total cfm rating, total horsepower rating, etc.), in order to adequately assess the proposed operation.

Process Description:

Include a process description by which you thin and apply the materials used at your facility (eg. hand application, cutter gun, molds, etc.). This description should depict a "cradle-to-grave" operation.

Material Safety Data Sheets:

Submit copies of Material Safety Data Sheets or Air Quality Data Sheets for all materials containing Volatile Organic Compounds (VOC) used in the fiberglassing operation.
