Non-emergency > 300 HP located in areas of Alaska not accessible by the Federal Aid Highway System (FAHS) must meet management practice requirements. Recordkeeping and reporting requirements are not included in this table.

Existing Non-emergency (≤ 300 HP):

- Minimum engine idle time and engine starting to a period needed for appropriate and safe running, not to exceed 30 minutes.
- Demonstrating Compliance: Operate and maintain the stationary RICE according to manufacturer’s instructions or implement a maintenance plan that provides to the extent practicable for the maintenance and operation of the engine in a manner consistent with good air pollution control practices for minimizing emissions.
- Initial performance test and testing every 8,760 hours of operation or 3 years, whichever comes first.
- If using an oxidation catalyst, the engine must continuously monitor operating parameters approved by Administrator.

Existing Non-emergency (≤ 300 HP):

- Maximum engine idle time and engine starting to a period needed for appropriate and safe running, not to exceed 30 minutes.
- Model performance test:
  - Except during Startup: None
  - During Startup: Minimize engine idle time and engine startup to a period needed for appropriate and safe loading, not to exceed 30 minutes.
  - Testing: None
  - Demonstrating Compliance: Operate and maintain the stationary RICE according to manufacturer’s instructions or implement a maintenance plan that provides to the extent practicable for the maintenance and operation of the engine in a manner consistent with good air pollution control practices for minimizing emissions.

Existing Non-emergency (≤ 300 HP):

- Minimum engine idle time and engine starting to a period needed for appropriate and safe running, not to exceed 30 minutes.
- Model performance test:
  - Except during Startup: None
  - During Startup: Minimize engine idle time and engine startup to a period needed for appropriate and safe loading, not to exceed 30 minutes.
  - Testing: None
  - Demonstrating Compliance: Operate and maintain the stationary RICE according to manufacturer’s instructions or implement a maintenance plan that provides to the extent practicable for the maintenance and operation of the engine in a manner consistent with good air pollution control practices for minimizing emissions.

Existing Non-emergency (≤ 300 HP):

- Minimum engine idle time and engine starting to a period needed for appropriate and safe running, not to exceed 30 minutes.
- Model performance test:
  - Except during Startup: None
  - During Startup: Minimize engine idle time and engine startup to a period needed for appropriate and safe loading, not to exceed 30 minutes.
  - Testing: None
  - Demonstrating Compliance: Operate and maintain the stationary RICE according to manufacturer’s instructions or implement a maintenance plan that provides to the extent practicable for the maintenance and operation of the engine in a manner consistent with good air pollution control practices for minimizing emissions.
